

SUPREME COURT COURT USERS

1. Admin - User Groups

A link has been added to the user name. This link will take you to the Court Employee Directory page. From there, you can view the user's permissions. The list of Allowed Case Types has been alphabetized for readability.

2. File Court Document

- a. The security options have changed to only include "sealed" and "sensitive".
- b. If the radio option "Main Motion" is selected and the court is "Bronx, Queens, or New York", the "Reference Motion" section will be shown, otherwise this section will not be shown.
- c. If the Reference Motion/OSC select box is being shown and the case doesn't have any motions on file, instead of showing an empty select box, a message will be shown "NYSCEF has no record of a main motion document in this case".
- d. Error message change: For the email notification section, if someone enters both a routing group and an email address, the error will be: When adding multiple notifications, you must choose either a Routing User Group or enter an E-Mail Address but not both.

3. Page Number Stamping

Certain documents can now be excluded from the page numbering stamp. This is database driven and can be updated without additional programming.

4. Return/Remove Document

The canned comments that display on this page will now be court specific and motion specific. If any of the documents being returned are motion type documents, additional comments will be available.
